- > Key: 1
- > Earth leakage protection: Type A + 6 mADC
- > Circuit breaker protection: 20 A

Description

COFRET boxes are designed to offer electrical protection in compliance with the **ITC-BT-52** standard for infrastructures designed to charge electric vehicles. The devices have a Type A RCCB for direct or indirect exposure protection, and a C-curve circuit breaker to protect the recharging units in the event of overloads or short-circuits. If the installation does not have overvoltage protection, a model is available that includes both permanent and transient surge protection.

Application

The **COFRET** box is absolutely essential when installing any single-phase electric vehicle charging point.
